# PREFACE

This two-year cumulation of the Industrial Arts Index, the sixth of the series, covers approximately the years 1928 and 1929, and includes the periodical references and the 4417 book titles that have appeared in the current numbers of the Index during that period.

Airway Age and Oil and Gas Journal were added to the list of magazines indexed beginning with 1929. Business Week was added beginning with its initial number, September 7, 1929; and Melliand (American edition) with its initial number, April, 1929; System has been indexed since July, 1929.

The List of Technical Societies on the following pages has been revised for this volume and some additions made.

Louise Teich has been the mainstay of this Index from its beginning and it is but just to say that it could not have reached its present state without her. Marian Lord Hazard has assisted in indexing and proofreading thru the two-year period. Leona Kohn has likewise helped during the latter part of the period. Acknowledgment should be made again to Charlotte Trilling and Jessie Van Strander for their work on this and previous volumes and to Grace Gilbert and Ruth Ward for their services thru most of the past two years.
